Metabolism (/ m Ę™ Ę^ t Ā! b Ę™ | Ę^a z Ę™ m /, from Greek: ἠμεταβολή, ἠμεταβολή»ἠμεταβολή, "change") is the set of life-sustaining chemical transformations within the cells of organisms. The three main purposes of metabolism are the conversion of food/fuel to energy to run cellular processes, the conversion of food/fuel to building blocks for proteins, lipids, nucleic acids, and some carbohydrates ...

Metabolism - Wikipedia

A solar cell, or photovoltaic cell, is an electrical device that converts the energy of light directly into electricity by the photovoltaic effect, which is a physical and chemical phenomenon. It is a form of photoelectric cell, defined as a device whose electrical characteristics, such as current, voltage, or resistance, vary when exposed to light.. Individual solar cell devices can be ...

Solar cell - Wikipedia

Choosing a research topic is an important decision at any level. The choice shapes decisions about what graduate lab to join, which post-doctoral position to pursue, how to start an independent lab, and what companies might make good employers.
