Great story, Mark. I arrived at the conclusion that Intel's switch to cobalt is premature (among other things) independently, without contacting people involved, and before Intel's IITC paper and recent publications from Applied Materials became available, which, along with your article is a great proof of my previously published analysis.

Instrumentation is a collective term for measuring instruments used for indicating, measuring and recording physical quantities, and has its origins in the art and science of scientific instrument-making.. The term instrumentation may refer to a device or group of devices used for direct reading thermometers or, when using many sensors, may become part of a complex industrial control system in ...
