This is a list of important publications in chemistry, organized by field.. Some factors that correlate with publication notability include: Topic creator – A publication that created a new topic.; Breakthrough – A publication that changed scientific knowledge significantly.; Influence – A publication which has significantly influenced the world or has had a massive impact on the ...

List of important publications in chemistry - Wikipedia

Fluorine is a chemical element with symbol F and atomic number 9. It is the lightest halogen and exists as a highly toxic pale yellow diatomic gas at standard conditions.As the most electronegative element, it is extremely reactive: almost all other elements, including some noble gases, form compounds with fluorine.. Among the elements, fluorine ranks 24th in universal abundance and 13th in ...

Fluorine - Wikipedia

Organic matter preservation is central to understanding biological potential on Mars through time. Whether it holds a record of ancient life, is the food for extant life, or has existed in the absence of life, organic matter in martian materials holds chemical clues to planetary conditions and processes.

Organic matter preserved in 3-billion-year-old mudstones

Abstract. A gap in emission inventories of urban volatile organic compound (VOC) sources, which contribute to regional ozone and aerosol burdens, has increased as transportation emissions in the United States and Europe have declined rapidly.

Volatile chemical products emerging as largest

Abstract. Scattered literature is harnessed to critically review the possible sources, chemistry, potential biohazards and best available remedial strategies for a number of heavy metals (lead, chromium, arsenic, zinc, cadmium, copper, mercury and nickel) commonly found in contaminated soils.

Heavy Metals in Contaminated Soils: A Review of Sources
