

soa governance pdf

Information and technology (IT) governance is a subset discipline of corporate governance, focused on information and technology (IT) and its performance and risk management. The interest in IT governance is due to the ongoing need within organizations to focus value creation efforts on an organization's strategic objectives and to better manage the performance of those responsible for creating ...

IBM Cloud Products | IBM

A service-oriented architecture (SOA) is a style of software design where services are provided to the other components by application components, through a communication protocol over a network. The basic principles of service-oriented architecture are independent of vendors, products and technologies. A service is a discrete unit of functionality that can be accessed remotely and acted upon ...

The Statement of Applicability (SoA) is one of the key documents in an ISO 27001 information security management system (ISMS). It identifies the controls you have selected to address the risks that were identified in the risk assessment process, explains why those controls have been selected, states whether or not they have been implemented, and explains why any Annex A controls have been ...
