water supply and sanitary pdf

Access to water supply and sanitation in Ethiopia is amongst the lowest in Sub-Saharan Africa and the entire world. While access has increased substantially with funding from foreign aid, much still remains to be done to achieve the Millennium Development Goal of halving the share of people without access to water and sanitation by 2015, to improve sustainability and to improve service quality.

Water supply and sanitation in Ethiopia - Wikipedia

A water supply system or water supply network is a system of engineered hydrologic and hydraulic components which provide water supply. A water supply system typically includes: A drainage basin (see water purification - sources of drinking water).; A raw water collection point (above or below ground) where the water accumulates, such as a lake, a river, or groundwater from an underground aquifer.

Water supply network - Wikipedia

The Board of Water Supply owns and maintains approximately 105 miles of mains and 1,140 fire hydrants. Its primary responsibility is to provide an adequate supply of safe, potable water for domestic, industrial and fire-fighting purposes.
